PROFESSIONAL SUMMARY

Ownership-driven Associate Product Manager with 1+ year of hands-on experience building and scaling enterprise **B2B SaaS products** in AI automation environments. Experienced in writing **Product Requirement Documents (PRDs)**, converting customer problems into engineering-ready solutions, conducting **User Acceptance Testing (UAT)**, analyzing product performance, and driving cross-functional execution. Skilled at customer discovery, product analytics, roadmap prioritization, and **AI product evaluation**. Passionate about building AI-powered products that solve real-world operational challenges.

CORE COMPETENCIES & TECHNICAL SKILLS

Product Management	Product Requirement Documents (PRDs) , Feature Specifications, User Stories & Acceptance Criteria, Backlog Grooming, Product Analytics, Roadmap Prioritization, UAT, Customer Discovery.
AI & Technical Skills	LLM Prompt Design, AI Output Evaluation, LangSmith, Python, SQL, Power BI , Advanced Excel, CI/CD Pipelines, Basic API Understanding, Data Analysis.
Business & Strategy	Stakeholder Management, Cross-functional Collaboration, Agile/Scrum Methodology, Competitive Analysis, Structured Problem Solving.

PROFESSIONAL EXPERIENCE

ASSOCIATE PRODUCT MANAGER | Aunix.ai (B2B SaaS | AI Automation)

Feb 2025 – Present

- Worked directly with the founding team and engineering teams to translate enterprise customer challenges into **scalable AI automation product solutions**.
- Product Requirement Documentation & Feature Delivery**
 - Authored detailed **Product Requirement Documents (PRDs)** covering user stories, acceptance criteria, and edge cases.
 - Converted complex customer problems into **engineering-ready tasks** and collaborated closely with engineering teams throughout sprint execution.
 - Ensured implementation quality by challenging shortcuts that could negatively impact customer experience.
- Customer Research & Product Improvement**
 - Conducted **mixed-method customer research** through 1:1 interviews, surveys, and usability walkthroughs.
 - Identified onboarding friction points affecting enterprise users and converted customer insights into **actionable product requirements**.
 - Contributed to onboarding redesign initiatives that significantly improved **first-time user experience**.
- User Acceptance Testing (UAT) & Quality Assurance**
 - Designed and executed **25+ structured test scenarios** testing core user journeys, edge cases, and integration points.
 - Identified recurring product issues before release and supported **bug prioritization** and release readiness activities.
- Product Analytics & Performance Monitoring**
 - Built a **three-level KPI framework** aligned with AI workflow adoption goals.

- Implemented automated **LangSmith evaluation runs** to monitor feature performance.
- Projected a **25–30% increase in workflow adoption** and achieved a **30–35% reduction in delivery variance** using data-driven roadmap prioritization.

Documentation, Strategy & Competitive Analysis

- Created **product documentation**, demo scripts, customer onboarding guides, and workflow specifications.
- Conducted **competitive benchmarking** of workflow automation platforms including Zapier and Beam to identify capability gaps.
- Influenced **feature prioritization** across two sprint cycles based on market analysis.

PROJECTS

Generative AI Adoption in Indian Business – Primary Research

Jan 2025

- Planned and executed structured market research involving **100+ enterprise and SMB professionals**.
- **Key Insight:** 75% of organizations have implemented Generative AI at some level.
- Research findings were successfully published in **JAGSoM's RFP Book**.

EDUCATION

2023 – 2025	Post Graduate Diploma in Management (PGDM) – Digital Business & Analytics JAGSoM – Jagdish Sheth School of Management, Bangalore
2018 – 2021	Bachelor of Commerce (B.Com Honours) National Institute of Science and Technology, Berhampur
